# Director's Message

MIM takes pleasure in providing students with the knowledge and skills necessary for them to make meaningful contributions in the area of their choice. Our innovative educational approach, uniquely titled "PRIME", attempts to build a strong foundational approach with an exploratory and creative mindset, in addition to providing an exceptional learning experience for our students.

By bringing together both academic and business professionals, we foster curiosity, broaden horizons, and develop leadership skills in an ever-demanding corporate environment.

A further example of the unique and progressive methods used only at MIM is the idea of placing top-tier corporations on our campus. This is what we refer to as "Corporate-in-Campus," which is crucial in giving our students abundant opportunities to gain first-hand knowledge and professional experience from the corporate sector, right on our campus.

As we progress steadily as an upcoming management school in Tamil Nadu, I take this opportunity to welcome you to MEASI Institute of Management, and I am highly optimistic that the search for an ideal work force, matching your corporate standards and requirements, will certainly culminate at MIM.

# Entrepreneurship Ideals

Success is not the key to happiness, but happiness is the key to success. If you love what you are doing, you will be successful – Albert Schweitzer

Business landscape in India speaks of a long history & diverse culture when a larger part of the country, was involved in commercial trade with various global markets. Today, with our millennial population evolving into a sustainable community with their own ventures, we are witnessing a spurt in the start-up ecosystem.

Mindsets and thought process have been undergoing a paradigm shift, with majority of the young-gen exploring ways and means to start their own venture.

Furthermore, with many start-ups achieving unicorn status, our youth have started developing a strong affinity towards exploring newer options to become successful entrepreneurs.

At MIM, entrepreneurship is considered, not only, as a prime gateway towards enhanced employment opportunities that fosters economic growth, but also to instil a strong leadership persona in every student who wishes to pursue the journey towards his or her own goal.

To strengthen and hone excellent entrepreneurial abilities, MIM emphasizes on a laser focus approach towards enhancing core technical and people management skills, that plays a pivotal role in sharpening their business acumen and builds in key traits that are characteristic of a true entrepreneurial icon.

Our students are made to focus on biography reading, engage and participate in key networking sessions, build and present business models and drive a raging passion within them towards ownership and accountability, which eventually is what true entrepreneurs are made of.

Bottomline, MIM truly believes that regardless of the career path students choose, their attitude needs to have an entrepreneurial and business owner approach.
